

IT & DATA DRIVEN JOBS

Healthdata.be is the branch of Sciensano that provides researchers and policy actors with support in the field of healthcare technical expertise, as well as in the field of developing and managing policy-supporting scientific research databases. The platform helps healthcare actors to exchange medical data with researchers in a secure and efficient manner, which can then be used for policy-supporting scientific research. The mission of Healthdata.be is to facilitate the exchange of data between healthcare professionals and researchers in order to increase knowledge about public health in Belgium.

JOB DESCRIPTION

We are currently looking for people with IT skills to strengthen our Healthdata.be platform. Candidates are expected to deploy a high level of expertise to manage and finalize various processes.
